I am a final-year student of Software and Information Technology at the Faculty of Technical Sciences in Novi Sad. I am passionate about exploring new technologies and software development, as well as continuous learning and professional growth. My goal is to contribute to innovative projects and work on solutions with real-world applications. My experience in various fields has helped me develop adaptability, analytical thinking, and problem-solving skills, which I consider essential for my further professional development. I am eager to apply my knowledge and skills in a challenging and dynamic work environment.

Work experience

Agricultural Producer 2017 -
PG Stojkov Svetozar, Novi Sad
Farm management. Wheat, soybean, corn, sunflower, and barley farming. Performing agronomic measures and maintaining agricultural machinery.

Warehouse Dispatcher III (Night Shift) 2023 - 2025
Press International d.o.o. Novi Sad, Novi Sad
Receiving daily and special edition newspapers, sorting them by sales points, packing, and delivering them to retail outlets.

Telecommunications Equipment Installer 2018 - 2022
GardNet, Novi Sad
Installing and configuring telecommunications equipment according to specifications and standards. Maintaining records of equipment performance and maintenance.

Education and Qualifications

Professional Software Engineer 2022 -
Faculty of Technical Sciences, Novi Sad
Mechatronics Technician 2014 - 2018
ETŠ Mihajlo Pupin, Novi Sad

Notable projects

Project Management Platform
Developed a scalable project management platform using a microservices architecture in a 4-member team. The platform allows users to manage projects and tasks, with roles such as Project Manager and Member. Key features include user authentication, task status management, notifications, workflow management, and project analytics.
Tech Stack: Angular, Go, Docker, MongoDB, Cassandra, REST APIs, JWT

Tourist Agency Web MVC Application Developed a web-based MVC application for a tourist agency, supporting both registered and unregistered users. Registered users include customers and managers. The application allows users to search, book, and manage travel packages, including features such as user registration, login, profile management, and role-based access. Managers can add, update, and manage travel packages, while customers can make reservations and view discounts. The platform also supports personalized travel requests and dynamic offers based on seasonality. **Tech Stack:** Java, Spring MVC, Thymeleaf, Hibernate, MySQL, HTML, CSS, JavaScript
